This listing of claims will replace all prior versions, and listings, of cla ms in the application:

Listing of Claims:

1.   (Original) A method of routing electronic mail messages to a user with a server, the method comprising the steps of:

      (1)   receiving at a mail server an electronic mail message having a lestination address;

      (2)   receiving from a user at the mail server an identification of a main electronic mail address and at least one alias electronic mail address;

      (3)   comparing the destination address to the main and at least one alias electronic mail addresses; and

      (4)   transmitting the electronic mail message to an address determined as a result of the comparing step.

2.   (Original) The method of claim 1, wherein step (4) comprises:

      transmitting the electronic mail message to the destination address when the destination address is indicated as a main address; and

      transmitting the electronic mail message to a main address when the (estination address is indicated as an alias address corresponding to the main address.

3.   (Previously Presented) A method of providing an electronic mail service to users, the method comprising the steps of:

      (1)   registering a main electronic mail address for a user;

      (2)   providing at least one alias electronic mail address to the user; and

-2-

(3)   comparing a destination address of an electronic mail message o the main

electronic mail address and the at least one alias electronic mail address; and

(4)   delivering electronic messages addressed to the main address and

electronic mail messages addressed to the at least one alias address to a single electronic

mail inbox.

4.   (Currently Amended) The method of claim 3, further including the step of:

([4]5) allowing the user to manage the at least one alias electronic mail address.

5.   (Original) The method of claim 4, wherein the allowing steps comprises allowing

the user to delete alias electronic mail addresses.

6.   (Original) The method of claim 4, wherein the allowing steps comprises allowing

the user to add alias electronic mail addresses.

7.   (Original) The method of claim 3, further including the step of providing a record

of electronic messages sent by and received by the at least one alias electronic mail address.

8.   (Original) The method of claim 7, further including the step of displaying

electronic messages received by the at least one alias electronic mail address.

9.   (Original) The method of claim 3, further including the step of providing the

main electronic mail address to the user.

10.   (Original) An electronic mail server configured to perform the steps of

(1)   receiving an electronic mail message having a destination address;

(2)   comparing the destination address to addresses included in a database of

main and alias electronic mail addresses; and

(3)   transmitting the electronic mail message to an address determined as a

result of the comparing step.
